PROBLEM STATEMENT

Traditional paper-based portfolios are difficult to maintain, share, and update. Students and professionals often struggle to present their skills, achievements, and projects in an organized and accessible way. A digital portfolio solves this by providing a centralized, interactive, and easily shareable platform to showcase work efficiently.

PROJECT OVERVIEW

A digital portfolio is an online platform to showcase personal, academic, and professional achievements.

It includes sections like profile, education, skills, certifications, projects, and contact details.

The portfolio is designed to be user-friendly, visually appealing, and easy to navigate.

It allows continuous updates and can be shared easily with employers, educators, and peers.

The project enhances personal branding and career opportunities by presenting information in an organized digital format.

It combines creativity, technology, and professionalism for effective self-representation.

END USERS

Recruiters / Hiring Managers – to evaluate skills, projects, and experience.

Teachers / Professors – to assess academic work, assignments, or project submissions.

Clients – to view previous work before offering freelance or project opportunities.

Peers / Colleagues – to collaborate, share knowledge, and give feedback.

General Audience – anyone interested in learning about your skills, achievements, and personal brand.
